Electives

Not all electives are available every semester or academic year. Please see your advisor for current list of electives.

RED 614. Applied Real Estate Finance and Investments: Level II
This course builds a foundation for further study of real estate investments and development. This course provides for advanced application of theory and techniques at the entity and deal-level. Discounted cash flow models are developed and enhanced to address topics including partnerships and waterfalls, income tax considerations and a greater exploration of a variety of public and private debt instruments. Emphasis is placed on analyzing the performance of a prospective development across the entire capital stack.
Typically Offered: Fall and Spring
Prerequisite: RED610, RED612 and/or Approval from Professor

RED 640. Applied Design Skills for Developers
This course provides developers with essential knowledge in urban design and architecture, emphasizing the creation of economically, environmentally, and socially valuable projects through master planning, street design, and individual lot development, with a focus on walkable, car-optional spaces. Students will learn urban design principles, form-based codes, and the design process to enhance their vision for a site and facilitate communication with design professionals, culminating in the creation of a conceptual neighborhood, streets, and building design.
Typically Offered: Fall
Prerequisite: None

RED 642. Urbanismus Practicum
This course was developed specifically as an introduction to architecture and urbanism for MRED+U students. Introduction to the lexicon of urbanism; review of greatest intellectual traditions in city design; survey of urban design techniques; inspection of global state of contemporary urbanism and sub-urbanism; review of pertinent literature; examination of case-studies in urbanism and sustainability; exploration and critique of contemporary alternatives; introductory survey course for students with no urban design experience.
Typically Offered: Fall
Prerequisite: None

Zoning and the Shaping of Cities
This course introduces students to the history and contemporary significance of zoning regulations, emphasizing their impact on urban form, public space quality, and land valuation. Through presentations, readings, assignments, and discussions, students will explore zoning's role in shaping communities and its potential for promoting affordability, inclusion, and sustainability in urban development.
Typically Offered: Fall
Prerequisite: None

Retail Placemaking
This course provides an introduction to placemaking with a focus on retail real estate and its impact on communities. Development, architecture, and urban design are all critical elements and will be discussed in the class and evaluated in the field. The course will also identify leadership roles and participants in placemaking, which include developers and investors, architects, and urban planners, tenants, and customers. A developer who can match the right concept with the right location can generate substantial profits. Similarly, a well-executed placemaking plan creates value for all the participants in a community. The class will investigate the science of retail leasing and designing an executable placemaking plan.
Typically Offered: Fall
Prerequisite: None

PropTech
This course will survey the latest technologies being developed for use across the major sectors of real estate (single family residential, multifamily residential, commercial, design, construction, etc) and will provide an overview of the entrepreneurial process, with a focus on venture-backed startups. During the course, students will be asked to come up with a new business idea and develop it into a short investor pitch during the final session.
Typically Offered: Fall
Prerequisite: None

Advocacy for Architects: The Art of Approval
This is a multi-disciplinary course intended to prepare practitioners in the real estate development industry with a legal framework of the local government development approval process and the essential tools for developers, architects, and other design professionals to successfully present projects and secure entitlements within the regulatory and design approval process. The course will start with an overview of the legal principles animating the government's regulation of the use and development of land, including federal, state and local laws. The course will introduce students to the elements of successful advocacy, including effective communication with local government staff, preparation for public hearing presentations, public speaking, cross-examination, and emerging trends including impacts of new technology. Steve Wernick is a practicing attorney (Wernick & Co) who teaches this course on the entitlement process for RED and works with major developers throughout South Florida.
Typically Offered: Spring
Prerequisite: None

RED 618. Technologies and Tools for Commercial Real Estate
Students in the Technologies and Tools for Commercial Real Estate will learn basic skills for ARGUS Enterprise, REIS, Co-Star Real Capital Analytics and/or the latest in Real Estate Technology and Tools. Students will be introduced to concepts of entering, leases, budgets, market assumptions or valuation and yield parameters on a repetitive basis. The modules that are covered in the course include Valuation-Cash Flow, Portfolio Level Reporting and Sensitivity. Courses concentrate on practical applications of software and tools through interactive examples and case studies. Participants are exposed to a large cross section of software capabilities, fundamentals and unique nuances.
Typically Offered: Spring
